Antiquarian Bookman Study on Toto, ethnic group from north Bengal, India.

Voices from the Lost Horizon * It has QR codes which can be scanned to gain access to rare documentations: audio-visuals of Great Andamanese songs and tales "It is fortunate that a scholar with Professor Abbi's tenacity, as well as her scientific credentials, was available and willing to conduct this work. The volume is a superb introduction for the layperson to the wonderful world that Professor Abbi has opened up for us." - Bernard Comrie, Santa Barbara, California. "For two decades now, Abbi has marshalled the full intellectual and strategic weight of her training, disciplinary expertise and socio-cultural capital to document, preserve and share with the world the voices, songs, stories and laughter of the Great Andamanese." - Mark Turin, University of British Columbia, Vancouver. The Andaman Islands -- Great Andaman, Little Andaman, and North Sentinel Islands have been home for millennia to four tribes: the Great Andamanese, Onge, Jarawa, and Sentinelese. Their languages are known by the same name as that of the tribes. 'Great Andamanese' is a generic term representing ten languages among a family of languages that were once spoken by ten different tribes living in the north, south, and middle of the Great Andaman Islands. These languages were mutually intelligible like a link in a chain. However, today, Great Andamanese is a moribund language of the only-surviving pre-Neolithic tribe, breathing its last breath. When a language is on the verge of extinction, its history, culture, ecological base, knowledge of the biodiversity, ethno-linguistic practices, and the identity of its community -- everything is endangered. This is what prompted Prof. Anvita Abbi to conduct a research study to give life to the lost oral heritage of the vanishing world of the Great Andamanese. Voices from the Lost Horizon is a collection of a number of folk tales and songs of the Great Andamanese. These stories and songs represent the first-ever collection rendered to the Prof. Abbi and her team by the Great Andamanese people in local settings. The compilation comes with audio and video recordings of the stories and songs to retain the originality and orality of the narratives.

International Books in Print "Folklore as an Historical Science" by George Laurence Gomme. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten?or yet undiscovered gems?of world literature, we issue the books that need to be read. Bibliography on Scheduled Castes and Scheduled Tribes The numerous and varied indicators of environmental risks
point toward the likelihood of a systemic and catastrophic ecological failure at some point during this century.
Political inaction and cultural resistance, meanwhile, are even preventing the implementation of already
available technical solutions, which has led many experts to conclude that averting a global environmental
catastrophe is, foremost, a socio-political, rather than a technical, challenge. The World Science Union (ICSU)
has recognized that knowledge of the social sciences is indispensable for facilitating the major socio-cu.

Folk-lore (India). This edited book entitled "Recent Developments in Historical and Archaeological Researches in
Odisha", incorporating seventeen essays on Odisha’s past from prehistory to the modern period. All the seventeen
essays are original research papers based on primary and secondary data. These essays are arranged in
chronological order and focused on different aspects of Odisha in time and space i.e. prehistoric, protohistoric
and early historic archaeology of Odisha, Epigraphic studies, the political and economic history of the ancient
and medieval period, temple architecture, modern and contemporary history, and tribal studies.
Indian National Bibliography Setu and Anila stopped just short of the first forest, Sukaan? which was the only way to the dark woods of Ula. A nila's legs trembled as they stood there looking at the enormity of the dark woods. 'If this is Sukaan, how frightening will Ula be? She wondered. As they made their way slowly through the thickets in the dead of the night, Setu and A nila could not help but be overwhelmed by the majestic Silver Oaks, the coolness of the swaying fronds, and the swoosh of the tall shrubs that seemed to warn the trespassers of the impending danger they were getting closer to. Innocent and soul-stirring, Little Setu's story travels from the lush green, open meadows of Sundernagari in the A nadaman & N icobar islands, to the sinister creepiness of the Ula forest, where Setu and his friend A nila, encounter a series of adventures with the species of the forest and the tribal folk of the hidden realm of Shompen. Jui A ndhare's enchanting story captivates the imagination while sending out a strong message about the conservation of our forests and wildlife. Little Setu A nd T he Fo rbidden Fo rest O f U la, transports children and adults alike into a world without boundaries, where every living thing is kin.

Ethnobotany of A borigines of A ndaman-Nicobar Islands

Folk Tales of Nicobar In Rambunctious, expect humorous and breezy episodes as you travel to London and Paris and Amsterdam, to Beijing and Bangkok, to Hawaii, to far-flung Pohnpei, Tuvalu, and Fiji, and ultimately to terra incognita. The formula for these travel stories is based on the definition of a 'Blip Story,' a quick read of entertainment and thought. Nuggets of the exotic are contained throughout the passages; on every page and you will be reminded of lovely locations you know from your journeys or you will find that perfect tropical isle to inspire your next trip. Though the book is humor with idea, the subtext is connection with peoples around the globe. The stories depict the author's travel realities and unrealities, yet a backstory is visible, a backstory of how to 'go native.' The fruitful way to start a journey is to select an array of gifts for the locals you will encounter. A simple, inexpensive, and peculiar offering will open hearts that draw one into fascinating connections to exotic places and peoples. For going native with tribal folk, there are no better gifts with which to energize the experience than pinwheels and super balls. Another way to connect with the natives in one's travels is to use their language, and in surprising ways. To go native, create jokes from phrasebook phrases. In France, that means saying, "Merci beaucoup, whatever that means." Do say it all in French language-with a broken
accent. Humor is a language spoken by all of the peoples of the world, and this is the spine of the book. But, look out! Look out for the Sentinelese people on North Sentinel Island of the Andaman Islands. Do not go to visit these people, they will murder you on the dock-local custom and all. No, we are not kidding. Included with each story is a joke stolen from a well-known humorist, and at the end of each tale, the joke and humorist are noted. Guessing which joke in the story was stolen, and from whom, is the game to play while luxuriating in these locales. An easy click acquires this treasure of travel, one that will arrive with a bonus-a spy spoof set in the Principality of Monaco and around the world. And we publishers of this fine book of travel are proud of all, save our arithmetic. There are actually twelve travel stories in this book of ten travel stories. Yes, we've updated! Available in Kindle and paperback!

Tribal Education in Andaman and Nicobar Islands

Indian Books in Print The field of biocultural diversity is emerging as a dynamic, integrative approach to understanding the links between nature and culture and the interrelationships between humans and the environment at scales from the global to the local. Its multifaceted contributions have ranged from theoretical elaborations, to mappings of the overlapping distributions of biological and cultural diversity, to the development of indicators as tools to measure, assess, and monitor the state and trends of biocultural diversity, to on-the-ground implementation in field projects. This book is a unique compendium and analysis of projects from all around the world that take an integrated biocultural approach to sustaining cultures and biodiversity. The 45 projects reviewed exemplify a new focus in conservation: this is based on the emerging realization that protecting and restoring biodiversity and maintaining and revitalizing cultural diversity and cultural vitality are intimately, indeed inextricably, interrelated. Published with Terralingua and IUCN

The Indian National Bibliography This Book Is An In-Depth Study Covering Various Socio-Economic Dimensions Of Women In Arunachal Pradesh. The Study Covers Five Major Tribes Of Arunachal Pradesh, And The Author Has Conceptualized, And Has Displayed A Deep Sense Of Commitment To A Sensitive Subject.

Little Setu and the Forbidden Forest of Ula

Directory of Scientific Personnel of the Anthropological Survey of India The Nicobarese Culture Is Thoroughly On Oral Tradition Expressed In Folk Performances Like Folk Songs And Folktales. The Author Has Made A Commendable Venture In Collecting A Number Of These Nicobarese Folk Tales Keeping In View The Tribal Milieu And The Motifs Of Folk Tales. Also Included Are Historical Background Of The Nicobar Islands, Their Beliefs, Custom And Festivals.
A Sociological Study of the Toto Folk Tales This selection of 80 traditional short stories and legends from the vast Maldivian oral tradition - the first of its kind - offers a unique insight into the history, culture and beliefs of the Maldivians and into the world they live in. Of great interest not only to scholars but also would-be travellers. The Maldives are mainly known as an equatorial tourist paradise to the south of India but some will know the archipelago risks drowning owing to global warming. Far less is known about the people, who have occupied these islands for millennia but whose deep indigenous culture is today under threat from a multitude of external forces. This volume is a collection of 80 traditional short stories and legends selected from the large corpus of stories in the local oral tradition, and translated and illustrated by the author who is the foremost authority on the language and anthropology of the Maldives. These folk tales offer keen insights both into the history, culture and beliefs of the people of the Maldives and into the world they live in. The close relationship the Maldivians have with their environment is clear, likewise the syncretic nature of their Islamic faith, the tales bustling with spirits, sorcerers and monsters as well as local people, seabirds, etc. Would-be travellers to the Maldives will find this a unique insight into the real country behind the tourist brochures. For scholars, the folk tales and analytical material offer a wonderful literary/folklore resource as well as fresh perspectives on the effects of globalization.
